REAL TIME SOLUTIONS

## SaaS Services

### Highgate SaaS

Software as a Service (SaaS) is a software licensing and delivery model in which software is licensed on a subscription basis and is centrally hosted. The Highgate SaaS Model delivers functionally rich solutions, speed of deployment, scalability and right pricing. Our ability to grow with your organization makes us the optimal partner to provide an effective and efficient suite of solutions that can be tailored to your specific needs.

### Highgate SaaS Advantage

There is a lot of power in the Highgate SaaS Solution. It removes the need for your organization to install and run applications on its own computers or in its own data centers. This eliminates the expense of hardware acquisition, provisioning, maintenance, software licensing, specialized staff, installation and support.

Our pay-as-you-go model transitions costs into a recurring operating expense which simplifies your operations and allows your business to exercise better and more reliable budgeting. Our solutions are scalable and will grow as your business needs grow without the wait or the burden.

### What do we deliver

**Affordability.** Pay for what you need when you need it

**Functionality.** Our solutions are functionality rich out of the shelf.

**Scalability.** Our solutions will grow with your business, technological, transactional and functional wise.

**Reliability.** Highgate SaaS includes High availability, Disaster Recovery and Support services to suit your needs.

**Integration.** We can integrate our solutions with other vendors via APIs or as required.
